Credit Markets Weekly Wrap

Against the wind

June has brought more than $15 billion of refinancing volume to the leveraged loan market, the most since February. Several new deals announced this week are from issuers that were recently upgraded from the triple-C bracket, and one deal even comes from an issuer still rated triple-C.

— Commentary, page 7

While the leveraged credit markets have largely shrugged off geopolitical uncertainty, PitchBook LCD's survey of buyside, sellside, and advisory professionals suggests a shift toward more defensive positioning.

— US Leveraged Finance Survey, page 10

Despite rising geopolitical tensions, the high-yield bond market has remained largely steady. Primary issuance this week is expected to top $9 billion, slightly up from last week's $8.93 billion.

Technicals

Repayments for the week ended June 20 were $2.31B, down from $4.04B for the week ended June 13. The trailing-52-week average is $5.79B. The forward calendar of institutional deals fell to $23.55B on June 25, from $29.22B on June 18. For the week ended June 20, $4.3B of performing institutional loans were taken out. The amount of performing institutional loans has increased 5.40%, to $1.487 trillion as of June 20, from $1.411 trillion on Dec. 31, 2024.

Loan secondary: Regression to the mean page 15

Following a monthslong whiplash stemming from US tariffs and the ongoing conflicts in the Middle East, leveraged loan trading volume may be normalizing after historically high secondary activity. LSTA data show that around $102.8 billion of loans changed hands in March, followed by $109.2 billion in April, which was the second highest level on record following only March 2020. Volume settled back to $79 billion in May, more in line with January's $69.5 billion and February's $82.4 billion.

Private credit & middle market: Deal with it page 18

The restoration of M&A activity to full throttle — or at least the "normal" speed of dealmaking — is top-of-mind for private credit investors and market participants. According to a new survey, more than half of private equity sponsors, at 53%, anticipate that M&A activity will return to normalized levels in the first half of 2026, while another 15% expect that it won't happen until later.

High-yield primary: Unfazed page 30

Despite rising geopolitical tensions, the high-yield bond market has remained largely steady. Primary issuance this week is expected to top $9 billion, slightly up from last week's $8.93 billion. The number of tranches also rose, with 12 expected to price by Friday, versus 10 last week. June is on track to surpass $32 billion in issuance by this week's close, marking the highest monthly volume in nine months.

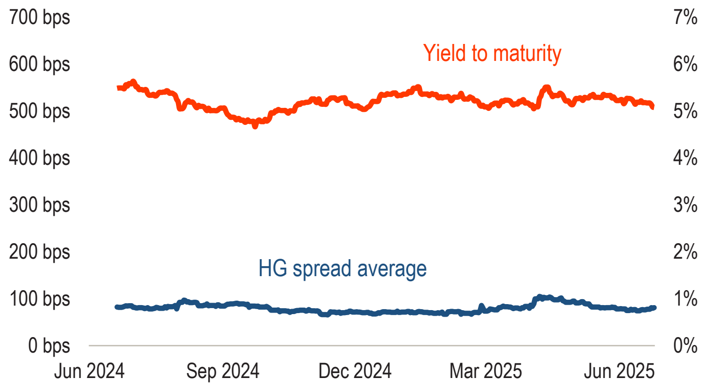
High-grade corporate spreads and yields



Source: Barclays

High-yield secondary: Chasing the sun page 35

Cash-bond prices advanced over the week and the new-issue pipeline churned as a roiling geopolitical backdrop failed to diminish risk appetite. Treasury rates eased further off their June peaks, while spreads edged five basis points tighter from Monday's open, to 293 bps off the curve. Meanwhile, the option-adjusted spread on LCD's flow-name sample of liquid high-yield issues tightened 19 bps this week, to T+282.

High-grade: On the regular page 36

Remarkably consistent deal flow in June included a roughly $32 billion influx June 23-26, which blasted past subdued expectations for about $20-25 billion for the entire week. Issuance is $96 billion for June. After May's dramatics (there were six double-digit session totals last month, including a $25 billion session on May 6), this month's totals are more regulated, with no session topping $10 billion.

Distressed: Out of sync page 37

As the second quarter of 2025 winds down, a wave of credit downgrades and restructuring moves has underscored deepening financial stress across sectors, with May marking the highest monthly global default count in nearly five years, according to S&P Global Ratings. Of May's 19 defaults, the US led with nine, bringing its YTD total to 30, while Europe saw six defaults, for a YTD tally of 16.

Morningstar LSTA US Leveraged Loan Index page 39

The Morningstar LSTA US Leveraged Loan Index returned 0.28% for the week ended June 25, bringing year-to-date loan returns to 2.53%, down from 4.28% during the same period in 2024. BB loans returned 0.22% for the week. Single-B loans returned 0.32%. CCC loans returned 0.26%. In the year to date, the All Loans Index has underperformed the BB Loans Index at 2.53% to 2.87%. Single-B loans have returned 2.50%.

Data excludes add-ons and repricings.

Data through June 26, 2025

Primary loan market: Do-over

June has brought more than $15 billion of refinancing volume to the leveraged loan market, the most since February. Several new deals announced this week are from issuers that were recently upgraded from the triple-C bracket, and one deal even comes from an issuer still rated triple-C.

Single-B rated issuers continue to dominate 2025 refinancing activity, accounting for about 63% of year-to-date volume and 60% of June's issuance. Those with a B- issuer rating on one side make up 36% of refinancing volume in the year to date. Borrowers carrying at least one triple-C rating are rare, with just $3.3 billion in the year to date. Most of that came from **Bausch Health**'s $3 billion refinancing in March, which stands out as the largest deal by a triple-C rated issuer for any purpose since 2012.

Radiology Partners launched a $1.5 billion seven-year covenant-lite term loan B through a Barclays-led arranger group at price talk of S+425-450, with a 0% floor and an OID of around 99-99.5. Pricing firmed at the wide end of that guidance at S+450 with a 99 OID, and with a step-down of 25 bps at 3.75x first-lien net leverage. Proceeds from the new term loan together with an $800 million issue of seven-year (non-call three) senior secured notes will be used to refinance the company's existing first-lien secured debt, including both a TLB and an issue of secured notes that were part of a February 2024 recapitalization that both have a PIK feature. The TLB will have a springing maturity to the company's outstanding $721.6 million issue of second-lien notes due 2030.

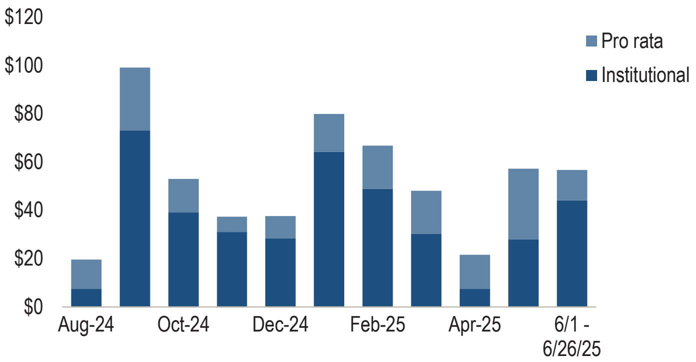
New-issue leveraged loan volume ($B)



Source: PitchBook | LCD

Launch of the refinancing followed a Moody's upgrade earlier this month to B3 from Caa1 for the issuer and B2 from B1 for the first-lien debt (the proposed debt was assigned a B2 rating this week). The agency cited "ongoing deleveraging following the recapitalization in February 2024 and improved performance." S&P Global Ratings this week assigned corporate and facility ratings of B-, with a stable outlook.

Rithum Holdings, formerly CommerceHub, is marketing a new $805 million six-year covenant-lite TLB through a Morgan Stanley-led arranger group. Price talk is S+450-475, with a 0% floor and an OID of 98. Proceeds from the deal, along with up to $350 million of preferred equity, will be used to fully refinance the company's existing first- and second-lien credit facilities. Those include an initial first-lien term loan due December 2027 (S+400, 0.75% floor), a second-lien tranche due December 2028 (S+700, 0.75% floor) and an incremental first-lien term loan due December 2027 (S+625, 0.75% floor) that was placed with private credit firms in 2022 to finance an acquisition.

Corporate and facility ratings came in at B-/B3, reflecting a one-notch upgrade by Moody's tied to debt reduction from the transaction at hand. "Rithum's pursuit of a capital structure with a less sizable, albeit still considerable, debt balance is indicative of the company's more balanced financial strategy, a key governance consideration and a driver of the rating action," the agency said.

In what would be the first issuance since March from a borrower with at least one triple-C rating, **American Bath Group** hit the market with an $825 million first-lien term loan led by JPMorgan. Price talk for the five-year covenant-lite term loan is S+525, with a 0% floor and an OID of 95-96. It comes alongside an $825 million offering of five-year (non-call two) senior secured notes and will fully repay existing first-lien term loan facilities. Around $90 million of proceeds will be used to support two potential acquisitions and $80 million will be used for transaction fees and expenses. Concurrently, ABG launched an exchange offer and consent solicitation in which holders of its 7.00% senior unsecured notes due December 2028 can swap into newly issued second-lien PIK toggle notes due 2031. The company will also have a new $207 million revolver due 2030.

Citing elevated leverage, S&P this week downgraded the issuer credit rating for ABG to CCC+ from B-, with a stable outlook. The proposed first-lien debt was assigned a CCC+ issue-level rating and 3 recovery rating, while a CCC- issue rating and 6 recovery rating were assigned to the proposed second-lien notes. Moody's affirmed the borrower at B3, but with a negative outlook, and assigned first-lien and second-lien ratings of B2 and Caa2, respectively.

American Bath's original covenant-lite TLB due November 2027 of roughly $1.32 billion is priced at S+375, with a 0.5% floor and a CSA of 10 bps. It was issued in November 2020 to support the buyout of the company by Centerbridge Partners, and it was subsequently repriced in January 2021 and upsized via an add-on in September 2021. In March 2025, the company obtained a $161 million incremental TLB due November 2027 (S+525, 0.5% floor) to fund an acquisition and repay revolver borrowings. The 2028 senior notes targeted in the exchange offer were also part of the original LBO financing. That issue totaled $510 million following a January 2021 add-on to fund a dividend.

Skechers this week was wrapping up its cross-border LBO financing with the loan portion clearing tight to talk. Pricing on the dollar tranche tightened to S+325, with a 0% floor and a 99.75 OID, from initial talk of S+350-375 at 99. The euro TLB firmed to E+350, with a 0% floor and a 99.75 OID, from E+375-400 at 99. The seven-year covenant-lite term loans also have a pricing step-down of 25 bps at 0.75x inside closing first-lien net leverage, as well as an IPO step-down. Tranche sizes of $1.55 billion and €1.25 billion reflect upsizings of $305 million and €500 million, respectively. Additional financing includes €1 billion of seven-year (non-call three-year) secured notes and $2.2 billion of eight-year (non-call three-year) unsecured PIK-toggle notes. A proposed issue of dollar secured notes was dropped.

Ratings are BB-/Ba3/BB- for the secured debt and BB-/B2/B+ for the issuer, and outlooks are stable from S&P and positive from Moody's.

The JPMorgan-led deal backs the take-private buyout of the footwear company by 3G Capital in a deal valued at $10.37 billion, including debt. 3G is supporting the deal with $4.54 billion of common equity. As part of the financing, Skechers is entering a $1.584 billion five-year revolver, to be undrawn at close, with a springing first-lien net leverage covenant set at 5.5x. The deal was marketed with pro forma total leverage of 3.9x based on adjusted EBITDAR of $1.89 billion for the 12 months ending March 2025, while first-lien leverage was 2.4x. The EBITDAR figure includes $250 million of "highly visible, near-term savings" and compares to pro forma adjusted EBITDA of $1.46 billion for the LTM through March.

Closing is expected in Q3, subject to regulatory approvals. Skechers shareholders with roughly 60% of the combined voting power of the outstanding common shares already approved the transaction, meaning no further shareholder approval is required.

Another loan-and-bond LBO financing clearing this week was for B/B3 rated **Sizzling Platter**. A Jefferies-led arranger group priced the $425 million seven-year term loan B and $80 million delayed-draw term loan for the restaurant operator at talk at S+500, with a 0% floor and an OID of 97, for a 10.31% yield to maturity. The DDTL will be available for 18 months with a ticking fee that kicks in after 45 days at 50% of margin, stepping to 100% of margin thereafter.

Bain Capital is acquiring Sizzling Platter from CapitalSpring. Additional financing includes a $500 million issue of 9.50% senior secured notes due July 2032 as well as a $175 million, five-year first-lien revolving credit facility with a springing consolidated first-lien net leverage covenant. Pro forma total leverage is 5.6x and net leverage is 5.4x. Interest coverage is 2x.
