“ Equity and grant-backed companies do better because they have more money, and **grants help de-risk equity**. But grants can distract companies as they'll just seek more for the sake of it, and not use it properly. That skews their focus because **grant and market demands often conflict**.

Martyn Buxton-Hoare,
Director of Technology Transfer

Founded 1891

Innovate UK projects 56

Innovate UK funding £8.47m

Number of students 15,050, over three faculties — Arts and Social Sciences, Engineering and Physical Sciences, Health and Medical Sciences.

Invests between \$500k - \$15m

Transactions funded
Growth capital, MBOs and acquisitions.

Investment focus Technology, with a focus on electronics, software, internet, medtech, and mobile.

draperesprit

“ Frequently companies will get grants before equity, so **grants are a useful signal of the technology moving into the market**.

Because the grant-winning process is difficult, it says something about the entrepreneur. But for the most part the grant sums on offer are small compared to VC rounds.

David Cummings, Partner
Isabella Cookson, Head of Research

University ranking
Universities are ranked by both number of IUK-funded projects and total IUK grant funding.

Equity investment
When used together with grant funding, equity investment has significant effects on company valuations.

Regional distribution
Both equity and grant finance are regionally concentrated. We look at every region in the UK.

Universities ranked by number of projects
