Grok Imagine, xAI's new
AI image and video
generator, lets you make
NSFW content

Elon Musk's AI company has officially rolled out Grok Imagine, xAI's image and video generator, to all SuperGrok and Premium+ X subscribers on its iOS app. And true to form for Musk, who positions Grok as an unfiltered, boundary-pushing AI, the generator allows users to make NSFW content.

Grok Imagine, which promises to turn text or image prompts into a 15-second video featuring native audio, has a "spicy mode" that allows users to generate sexually explicit content, including partial female nudity. There are limits to how explicit one can get. Many of our spicier prompts — made in the name of Journalism! — generate blurred-out images that are "moderated" and therefore inaccessible. We were, however, able to generate semi-nude imagery.

Imagine with [@Grok pic.twitter.com/Ulay5yNp97](https://twitter.com/Ulay5yNp97)

— Elon Musk (@elonmusk) [August 4, 2025](#)

The NSFW content is unsurprising for xAI, given the release last month of a [raunchy, hyper-sexualized anime AI companion](#). But just as Grok's unrestrained nature was entertaining until it started spewing hateful, antisemitic, misogynistic content, Grok Imagine could be poised to bring its own set of unintended consequences.

[CNBC first reported](#) the existence of a "[spicy mode](#)" last week after xAI employee Mati Roy said in a

TEC DISRUPT

Most Popular

- Key sections of the US Constitution deleted from government's website
- Instagram takes on Snapchat with new 'Instagram Map'
- Three weeks after acquiring Windsurf, Cognition offers staff the exit door
- Roku launches Howdy, a \$2.99 ad-free streaming service
- Spotify raises subscription prices

now-deleted post on X: “Grok Imagine videos have a spicy mode that can [do nudity](#).”

TechCrunch has reached out to xAI for more information.

The existing limitations with Grok Imagine are somewhat heartening given the model also lets you create content of celebrities — anyone from Donald Trump to Taylor Swift — and there appear to be additional restrictions on those. For example, TechCrunch tried, and failed, to generate an image of Trump pregnant. Grok Imagine only generated images of Trump holding a baby or next to a pregnant woman.

While it’s still early days for Grok Imagine, which aims to compete with incumbents like Google DeepMind, OpenAI, Runway, and Chinese rivals, the images and videos generated of humans are still a bit lost in the uncanny valley, with waxy-looking skin that verges on cartoonish at times.

- The uproar over Vogue’s AI-generated ad isn’t just about fashion
- Your public ChatGPT queries are getting indexed by Google and other search engines

Still, the generator is impressive. It produces images in seconds from a text prompt, and continues to auto-generate new images as you scroll. Those images can then be animated into stylized videos. The user interface is also seamless and intuitive.

Musk said [on X](#) that the model would “get better every day.”

The AI giant has [reached an agreement](#) with the U.S. General Services Administration (GSA), the government's central purchasing arm, to offer ChatGPT Enterprise to participating federal agencies for just \$1 per agency for the next year.

The partnership comes a day after the [GSA added OpenAI, Google, and Anthropic](#) to a list of approved AI vendors that can offer their services to civilian federal agencies. The companies will see their tools offered via the Multiple Award Schedule (MAS), a federal contracting platform that lets government agencies access AI tools via pre-negotiated contracts so they don't have to negotiate with vendors individually.

It's not clear whether other AI firms are going to offer their services at such a discounted rate,

though GSA Federal Acquisition Service commissioner Josh Gruenbaum in a [statement](#) encouraged “other American AI technology companies to follow OpenAI’s lead and work with us.”

TechCrunch has reached out to Anthropic and Google for more information.

In addition to access to ChatGPT Enterprise, OpenAI is offering unlimited use of advanced models for an additional 60 days. Federal employees will also have access to a new government user community and tailored introductory training resources to get familiar with OpenAI’s tools.

Data security is a top priority for government agencies that are concerned about sensitive information being leaked into model training sets. TechCrunch has asked the GSA for details on how government data is being safeguarded, including whether measures like on-premises or private cloud deployments are being used to enhance security.

“The government is taking a cautious, security-first approach to AI,” a GSA spokesperson told TechCrunch. “This ensures sensitive information remains protected while enabling agencies to benefit from AI-driven efficiencies.”

OpenAI’s discount comes a couple of weeks after the Trump administration published its AI Action Plan that seeks to boost data center buildouts and integrate more AI tools into government, among other things. It also follows a Trump executive order that [bans “woke AI”](#) and AI models that aren’t “ideologically neutral” from government contracts.

TechCrunch has reached out to OpenAI to learn more about its GSA partnership and how it will approach Trump’s executive order.

The Browser Company launches a \$20 monthly subscription for its AI-powered browser

Ivan Mehta — 11:26 PM PDT · August 6, 2025

The [Browser Company](#) has launched a Pro subscription plan for Dia, its new web browser that heavily integrates AI features. The plan costs \$20 per month and provides unlimited access to Dia's AI-powered chat and skills features.

The introduction of a paid tier means free users will now face usage limits on AI features. While The Browser Company hasn’t specified exact limits, CEO Josh Miller told [The New York Times](#) in July that the browser will remain free for those who use AI features “a few times a week.”

Level up with Dia Pro

Unlock more power with one simple plan.

Free

\$0

Includes

- ✓ Chat with your tabs
- ✓ Custom Skills
- ✓ A best-in-class browser

PRO

14-day free trial

\$20 / month

Includes everything in Free, plus

- ✓ Dia unlocked. Chat as much as you want, without hitting limits.*

Download Dia to begin

* provided usage is within our [Terms of Use](#), of course.

Miller also indicated that the startup plans to offer multiple subscription tiers, ranging from \$5 per month to hundreds of dollars monthly. The current \$20 plan appears to be one of several options based on different feature sets.

Earlier this week, users on [Reddit](#) and [Threads](#) noticed that The Browser Company had quietly made the Pro plan available online. However, the company quickly removed the page. Now the subscription option has been restored and can be accessed through Dia’s settings page.
