Key sections of the US Constitution deleted from government's website

Zack Whittaker, Dominic-Madori Davis

8:29 AM PDT · August 6, 2025

Several sections of Article 1 of the U.S. Constitution appear to have been removed from the official U.S. government website, as pointed out by sleuths on the internet and as seen by TechCrunch.

The changes were made in the past month, [according to the Wayback Machine](#), which shows the full original text on Congress' [website as of July 17](#).

Several [Reddit threads](#) identified the changes in Article 1 of the U.S. Constitution: Large parts of Section 8 have been removed, and Sections 9 and 10 have been deleted altogether. In the screenshot below, you can see the archived version of the site on the Wayback Machine on the left, and the current site on the right — the text highlighted in yellow has been removed.

These sections largely relate to the powers that Congress has and does not have, as well as limitations on the powers of individual states. The removal includes sections relating to habeas corpus, the powers that protect citizens from unlawful detention.

IMAGE CREDITS: LPETTET / GETTY IMAGES

Some of the sections' text appears to be missing, as indicated by a trailing semicolon at the end of Section 8, where text used to follow.

In [a tweet posted](#) on Wednesday, the Library of Congress said the sections were missing “due to a coding error” and expect it to be “resolved soon.” When contacted by TechCrunch, a spokesperson for the Library of Congress did not say what caused the coding error, or how it was introduced.

Changing the U.S. Constitution's text on the website does not change or have any effect on U.S. law, but it nevertheless follows senior Trump administration official Stephen Miller's threats earlier this year to [suspend habeas corpus](#).

When reached by TechCrunch, White House spokesperson Davis Ingle declined to comment beyond the Library of Congress' post.

To provide and maintain a Navy;	
To make Rules for the Government and Regulation of the land and naval Forces;	
To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;	
To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;	
To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;--And	
To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.	
Section 9	Article II
The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.	Article II Explained
The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.	Section 1
No Bill of Attainder or ex post facto Law shall be passed.	The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows
No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or enumeration herein before directed to be taken.	Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.
No Tax or Duty shall be laid on Articles exported from any State.	The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no Person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice

Yahoo removes DEI pages from its website

Zack Whittaker — 2:20 PM PDT · April 10, 2025

IMAGE CREDITS:

JAKUB PORZYCKI / NURPHOTO / GETTY IMAGES

Tech company Yahoo has removed several pages and other sections from its corporate website in recent months relating to its diversity, equity, and inclusion (DEI) policies, TechCrunch has learned.

A section of Yahoo's website that was previously [dedicated to DEI](#) no longer loads and [instead redirects](#) to the company's executive leadership page. A previous version of [Yahoo's leadership page from late 2024](#) touted language mentioning diversity and inclusion but [does not appear](#) on Yahoo's current website. Yahoo's [2022 diversity report](#) no longer loads and returns a ["page not found" error](#). While open positions on Yahoo's career website still advertise a link to Yahoo's former DEI page, the [page](#) now redirects to Yahoo's leadership page.

Yahoo, which owns TechCrunch, made the website changes between December 2024 and January 2025, according to historical copies of Yahoo's website hosted on the Internet Archive's [Wayback Machine](#).

Brenden Lee, a spokesperson for Yahoo, told TechCrunch in a statement: “We revamped our corporate website late last year as the first part of a planned, multi-phase redesign timed to CES and our Yahoo Ads relaunch. The first phase reduced the total volume of content by nearly 60 percent with a focus on streamlining navigation and spotlighting our advertising and business solutions.”

Yahoo is the latest U.S. company of late to scale back its public statements about DEI amid ongoing efforts by the Trump administration to crack down on DEI policies in both the public and private sectors.

Maine passes law preventing ISPs from selling browsing data without consent

Zack Whittaker — 1:13 PM PDT · May 30, 2019

Maine lawmakers have [passed a bill](#) that will prevent internet providers from selling consumers’ private internet data to advertisers.

The state’s senate unanimously passed the bill 35-0 on Thursday following an earlier vote by state representatives 96-45 in favor of the bill.

The bill, if signed into law by state governor Janet Mills, will force the national and smaller regional internet providers operating in the state to first obtain permission from residents before their data can be sold or passed on to advertisers or other third parties.

Maine has about 1.3 million residents.

The Republican-controlled Federal Communications Commission voted in 2017 to allow internet providers to sell customers’ [private and personal internet data and browsing histories](#) — including which websites a user visits and for how long — to advertisers for the biggest buck. Congress later [passed the measure into law](#).

At the time, [the ACLU explained](#) how this rule change affected ordinary Americans:

Your internet provider sees everything you do online. Even if the website you're visiting is encrypted, your ISP can still see the website name, how frequently you visit the website, and how long you're there for. And, because you are a paying customer, your ISP knows your social security number, full legal name, address, and bank account information. Linking all that information can reveal a lot about you – for example, if you are visiting a religious website or a support site for people with a particular illness.

In its latest remarks, the ACLU — which along with the Open Technology Institute and New America helped to draft the legislation — praised lawmakers for passing the bill, calling it the “strongest” internet privacy bill of any state.

“Today, the Maine legislature did what the U.S. Congress has thus far failed to do and voted to put consumer privacy before corporate profits,” said Oamshri Amarasingham, advocacy director at the ACLU of Maine, in a statement.

“Nobody should have to choose between using the internet and protecting their own data,” she said.

Update on June 6: Maine governor Janet Mills has signed the bill into law. In [a tweet](#), she said state residents can now be assured that their private data “can’t be bought or sold by their internet service providers without their express approval.”

Today I signed LD 946 “An Act To Protect the Privacy of Online Customer Information.” Maine people can now access the internet with the knowledge and comfort that their personal information can't be bought or sold by their internet service providers without their express approval

Trump threatens 25% tariffs on iPhones made outside the US

President Trump lashed out at Apple on Friday, threatening the company with a 25% tariff on iPhones unless it moves production to the U.S.

"I have long ago informed Tim Cook of Apple that I expect their iPhone's [sic] that will be sold in the United States of America will be manufactured and built in the United States, not India, or anyplace else," Trump wrote on Truth Social. "If that is not the case, a Tariff of at least 25% must be paid by Apple to the U.S. Thank you for your attention to this matter!"

Trump's post comes days after Apple's major manufacturing partner, Foxconn, [announced a \\$1.5 billion investment](#) in its India unit. Apple has been looking to shift hardware production to India as the trade war with China under President Trump takes unpredictable twists and turns.

In an earnings call earlier this month, Cook said that the majority of iPhones sold in the U.S. "will have India as their country of origin."

President Trump expressed his displeasure over Apple's shift to India last week while he was in the Middle East, [according to CNN](#). The two men also met on Tuesday, the outlet reported, although details on what they discussed were slim.

Trump has started ratcheting up attacks on companies trying to avoid the ramifications of U.S.-imposed tariffs. Just this weekend, [he wrote a post](#) calling for Walmart to "EAT THE TARIFFS," rather than pass them on to shoppers.
