6. COMPETITIVE LANDSCAPE (with identified competitors)

=====

- ? GKG: Competing technology in the fast charging space
- ? natom: Competing technology in the fast charging space
- ? Psoria: Competing technology in the fast charging space

7. BUSINESS MODEL

=====

StoreDot is a startup focused on extreme fast charging battery technology for electric vehicles (EVs). They aim to address the roadblocks hindering EV adoption, such as long charging times and limited infrastructure, by providing a worry-free fast charging experience. With a 3-5 year lead on alternative solutions, StoreDot's technology is scalable, proven, and commercially ready by 2025. Their solution, the 100in5 extreme fast charging cells, is being tested by over 15 OEMs and manufacturing partners worldwide, showcasing their potential for mass adoption in the EV industry. However, more information is needed on their revenue streams, customer segments, and go-to-market strategy to provide a comprehensive analysis.

Prior Exits: 2

Sector Experience: Battery Technology

10. ESG CONSIDERATIONS

=====

StoreDot's extreme fast charging battery technology aims to address the key roadblocks hindering EV adoption, such as long charging times and limited infrastructure. The technology boasts impressive performance metrics, including charging in 10 minutes and over 1200 consecutive cycles without degradation. With a clear production roadmap and a leadership team with extensive industry experience, StoreDot is positioned to lead the way in advancing sustainable and efficient EV charging solutions. However, more information is needed on the company's specific sustainability practices, social impact initiatives, and governance practices to provide a comprehensive ESG analysis.

11. RISKS & MITIGATIONS

=====

Overall Risk Level: HIGH

Risk Score: N/A / 1.0

IDENTIFIED RISKS:

- 1. Limited financial data
- 2. Unknown funding stage
- 3. Market competition
- 4. Regulatory risks

12. INVESTMENT & EXIT STRATEGIES

=====

Based on the information provided, StoreDot's extreme fast charging battery technology for EVs seems to have a strong potential for acquisition by major automotive companies looking to enhance their electric vehicle offerings. The technology's scalability, proven performance, and competitive cost structure make it an attractive target for acquisition within the next 3-5 years. Additionally, StoreDot's planned production readiness in 2024 and clear roadmap for future advancements position it well for a potential IPO in the medium term. However, more information on current partnerships, financials, and market traction would be needed to provide a more detailed analysis of potential exit scenarios.
