Send me the report

Inside this free report, you'll find out:

- The amount of capital deployed to private UK businesses in H1
- How investment varies by company stages of evolution
- The regional distribution of equity deals across the UK
- First-time fundraising trends
- Top investor types by deal volume
- Which high-growth tech sectors are thriving in 2022
- The 10 biggest deals of the half

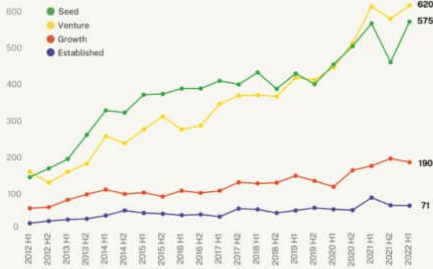

Stages of evolution

After an 18-month period of rapid growth, the number of Seed rounds announced in H2 2021 declined dramatically. So it's great to see that these early-stage deals have recovered in H1 of this year, up 24% from the previous half, and rising to a new high of 575.

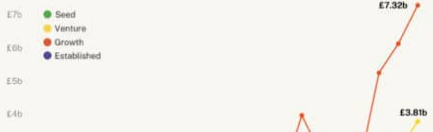

Meanwhile, the number of rounds being announced has also increased at the Venture stage, to a record 620 (+6%), while flattening out at the Established stage (-1%). Growth-stage deals, on the other hand, have seen a slight drop off (-5%), but have still increased overall since H1 of last year.

Looking at the amount of funding being secured, investment has increased across every stage of evolution. Record amounts were invested at the Venture (£3.81b), Growth (£7.32b), and Established (£2.67b) stages, while Seed-stage companies raised £1.09b, just below the peak of £1.14b seen in H2 2020.

2.1 Number of announced deals by stage of evolution

2.2 Amount raised via announced deals by stage of evolution
