North America Market Outlook: Q4 2023

According to a composite of the over 700 stocks we cover that trade on U.S. exchanges, as of Sept. 25, 2023, the U.S. equity market was trading at a price/fair value of 0.92, representing an 8% discount to our fair value estimates. Upward momentum propelled the market higher in July, and our price/fair value metric briefly touched fair value before the market gave up those gains and then some. Hawkish commentary from the U.S. Federal Reserve, rising energy prices, and higher interest rates took their toll in August and September.
