Allianz Life says  
‘majority’ of customers’  
personal data stolen in  
cyberattack

Zack Whittaker — 6:40 AM PDT · July 26, 2025

U.S. insurance giant Allianz Life has confirmed to TechCrunch that hackers stole the personal information of the “majority” of its customers, financial professionals, and employees during a mid-July data breach.

When reached by TechCrunch, Allianz Life spokesperson Brett Weinberg confirmed the breach.

“On July 16, 2025, a malicious threat actor gained access to a third-party, cloud-based CRM system used by Allianz Life,” referring to a customer relationship management (CRM) database containing information on its customers. “The threat actor was able to obtain personally identifiable data related to the majority of Allianz Life’s customers, financial professionals, and select Allianz Life employees, using a social engineering technique,” the spokesperson said.

The company disclosed the data breach on Saturday in a [legally required filing](#) with Maine’s attorney general but did not immediately provide a number of how many Allianz Life customers are affected. According to the spokesperson, Allianz Life has 1.4 million customers. Its parent company, Allianz, has more than 125 million customers worldwide.

Allianz Life said it notified the FBI and added it had “no evidence” that any other systems on its network

were compromised.

The insurance giant would not say if it had received any communication from the hackers, such as a ransom note. The company also would not attribute the breach to a hacking group.

Allianz Life is the latest company in the past month to have been hacked during a wave of data breaches targeting the wider insurance industry, [including Aflac](#), a major provider of supplementary health insurance. Security researchers at Google said in June that [they were “aware of multiple intrusions” across the insurance sector](#) attributed to Scattered Spider, a collective of hackers and techniques that rely on social engineering methods, such as deceptively calling and tricking help desks into granting them access to a company’s network.

Prior to targeting insurance companies, the Scattered Spider hackers were seen [targeting the U.K. retail industry](#), as well as the [aviation and transportation sectors](#), and are historically known for hacks [targeting Silicon Valley technology giants](#).

Per the Maine filing, Allianz plans to begin notifying affected individuals around August 1.

# US insurance giant Aflac says customers' personal data stolen during cyberattack

Zack Whittaker — 7:50 AM PDT · June 23, 2025

Aflac, one of the largest insurance companies in the United States, says hackers stole an unknown

quantity of its customers' personal information from its network during a cyberattack earlier this month.

The insurance giant confirmed Friday in a [legally required filing](#) with the U.S. Securities and

Financial Markets Commission that it had been hit by a

ransomware, but attributed the breach to an unspecified cybercrime group known to be targeting the U.S. insurance industry. According to [its Friday press release](#), Aflac said the hackers used social engineering tactics to break into its network.

An Aflac spokesperson, who did not provide their name, declined to answer TechCrunch's questions when reached by email on Monday.

Aflac, which has around 50 million customers per [the company's website](#), is the latest U.S. insurance company to experience a cyberattack in recent weeks, amid warnings that hackers are targeting the wider insurance industry.

John Hultquist, the chief analyst for Google's threat intelligence unit, said last week that the unit was "aware of multiple intrusions" in the U.S. that bear the hallmarks of activity linked to Scattered Spider,

a loose-knit collective of hackers and tactics that rely on [social engineering](#) tactics and sometimes threats of violence to target company help desks and call centers in order to gain access to their networks.

The hackers are also [reportedly behind](#) the recent intrusions at [Erie Insurance](#) and [Philadelphia Insurance Companies](#), which disclosed cyberattacks this month, with disruption ongoing.

The hackers linked to Scattered Spider attacks are known to be financially motivated and have been previously linked to cyberattacks and intrusions at [tech giants](#), [casinos, and hotels](#), and [recent data breaches](#) across the U.K. and U.S. retail sector.

Hackers stole Social  
Security numbers during  
Allianz Life cyberattack

Hackers who breached U.S. insurance giant Allianz Life earlier this month stole reams of customer Social Security numbers, according to notifications filed with several U.S. states and seen by TechCrunch.

Allianz Life disclosed [the July 16 breach this past weekend](#), confirming to TechCrunch the unidentified hackers stole the personally identifiable information belonging to the “majority” of its 1.4 million customers, as well as financial professionals and some Allianz Life employees.

The company said its customer relationship database was compromised in a [social engineering attack](#), a ploy in which malicious hackers use deception tricks, such as impersonating an employee claiming to have lost their password, to convince helpdesks into granting them access to a system or network.

In a [new filing](#) with the Texas attorney general, Allianz Life said the hackers stole names, dates of birth, postal addresses, and Social Security numbers from its database. A [separate filing](#) with the Massachusetts attorney general’s office also confirmed Social Security numbers were taken in the breach.

When reached by email, Allianz Life spokesperson Brett Weinberg said that the company is aware of
