Nintendo raising original
Switch console prices
due to ‘market
conditions’

Nintendo is raising the prices of its original Nintendo Switch game consoles, the [company announced on Friday](#). The price increases, which are taking effect on August 1, are due to “market conditions,” Nintendo says.

The company’s reference to “market conditions” likely hints at [President Donald Trump’s tariffs](#).

The affected products include the Nintendo Switch — OLED Model, Nintendo Switch, Nintendo Switch Lite, and select Nintendo Switch accessories. Other Nintendo products, including certain Nintendo Switch 2 accessories, select amiibo, and the Nintendo Sound Clock: Alarmo, will also see price increases.

It’s not yet clear what the new prices will be. Currently, the original Nintendo Switch retails for \$299.99, while the OLED model costs \$349.99.

Nintendo said it isn’t ruling out a future price hike for the [Nintendo Switch 2](#), which retails for \$450.

“Pricing for the Nintendo Switch 2 system, physical and digital Nintendo Switch and Nintendo Switch 2 games, as well as Nintendo Switch Online memberships, will remain unchanged at this time,” Nintendo wrote in its announcement post. “However, please note that price adjustments may be necessary in the future.”

year,” wrote Shuntaro Furukawa, the president of Nintendo, on X.

This wasn’t the actual announcement of the console, mind. Rather, Furukawa wanted to warn users not to expect the actual announcement in next month’s Nintendo Direct livestream.

“We will be holding a Nintendo Direct this June regarding the Nintendo Switch software lineup for the latter half of 2024, but please be aware that there will be no mention of the Nintendo Switch successor during that presentation,” the post reads.

Nintendo’s fiscal year ends in March, which means we might have to wait until Spring 2025 to learn what’s next for the Switch, released nine years ago.

This is Furukawa, President of Nintendo. We will make an announcement about the successor to Nintendo Switch within this fiscal year. It will have been over nine years since we announced the existence of Nintendo Switch back in March 2015. We will be holding a Nintendo Direct...

Nintendo's sly announcement accompanied its quarterly earnings report. The company's hardware sales declined 12.6% year-over-year, as is natural when its flagship console has been available for nearly a decade. Still, the Switch remains hugely popular, thanks to blockbuster exclusive titles like "[The Legend of Zelda: Tears of the Kingdom](#)," the long-awaited sequel to the classic "[Breath of the Wild](#)."

"Tears of the Kingdom" has [sold](#) 20.6 million copies over the last year, while "Super Mario Bros. Wonder" sold 13.44 million copies. Indie developers continue to push out games for the Switch, which

So, what will come first: the Nintendo Switch 2 or [Silksong](#)?

Nintendo says it now has more than 100 million annual playing users

Aisha Malik — 10:29 AM PDT · May 10, 2022

The company shared the new milestone as part of its [fiscal year financial results](#) for the period ending in March 2022. The results show that the company's annual playing users have been growing steadily over the past few years. Between April 2020 and March 2021, Nintendo had 87 million annual playing users. The company's earnings also reveal that Nintendo shipped 4.11 million Switch consoles between January and March, bringing its total to 23.06 million for the fiscal year. The number represents a 20% decline year over year when compared to the past year's figure of 28.83 million. Nintendo says the decline was due to shortages in semiconductors and other components.

Nintendo has shipped 107.65 million Switch consoles since it was launched in March 2017. The company forecasts sales of 21 million Switch units in the current fiscal year, which ends in March 2023. Nintendo also warned that some factors may impact the supply of products.

“If COVID-19 interferes with production or transportation in the future, this might impact the supply of products,” the company said in its [earnings release](#). “Other unpredictable risks to the development and marketing of products and services also continue to exist. In addition, the production of products might be affected by obstacles to the procurement of parts, such as the increase in global demand for semiconductor components.”

Nintendo is set to release a number of Switch games this year, including Splatoon 3, Xenoblade Chronicles 3, Pokémon Scarlet and Pokémon Violet. One of the most anticipated titles, The Legend of Zelda: Breath of the Wild 2, was recently delayed to spring 2023.

Review: Nintendo Switch OLED is a boon to handheld users but skippable as a home console update

The new version of Nintendo's hit Switch console is just different enough to justify itself, but hardly a must-buy for any of the millions who bought the launch version. With the Switch 2 coming, Nintendo is working on Virtual Game Cards for cross-device portability

Amanda Silberling — 7:49 AM PDT · March 27, 2025

Nintendo announced on Thursday that it is working on Virtual Game Cards, a feature that makes digitally downloaded games more portable across different devices. With the highly awaited [Nintendo Switch 2](#) on the horizon, these Virtual Game Cards will make it easier for users to port over their existing Switch games to their new devices.

As it stands, Switch games can be purchased either as a physical game card — like a traditional video game cartridge — or as a digital download. While physical game cards can easily be ejected and reinserted into another Switch for easy play, digital downloads have been a bit harder to port from device to device.

Available in late April, Virtual Game Cards are intended to make digital games operate more like physical ones. Players can easily migrate games between two devices, so long as they connect locally the first time a game is transferred.

The Virtual Game Cards also come with the functionality to lend games to anyone in your Nintendo Family Group, which includes up to eight people, via local Wi-Fi. Users can only lend one game at a time to a particular person, and at the end of a 14-day borrowing period, the games return automatically to the lender.

While there's no official word yet on when the Switch 2 will come out, fans are looking forward to [more information](#) about the console on a Nintendo Direct livestream scheduled for April 2.
