Q3 2024 figures

£1.48b invested

291 deals

Q3 2024 v Q2 2024 (previous quarter)

- £1.48b invested in Q3 2024, £2.33b less than Q2 2024
- 291 deals done in Q3 2024, 282 less than Q2 2024
- 61% decrease in amount invested
- 49% decrease in number of deals

Q3 2024 v Q3 2023 (year-on-year)

- £1.48b invested in Q3 2024, £1.35b less than Q3 2023
- 291 deals done in Q3 2024, 290 less than Q3 2023
- 48% decrease in the amount invested
- 50% decrease in the number of deals

Quarterly review

There was a sharp reduction in the number of announced deals and value invested in Q3 compared to Q2 2024. Whilst this is a continuation of alternating quarters of high and low amounts invested, the 61.2% decrease in the amount invested is much more stark than the 24.1% reduction seen in the previous instance between Q4 2023 and Q1 2024.

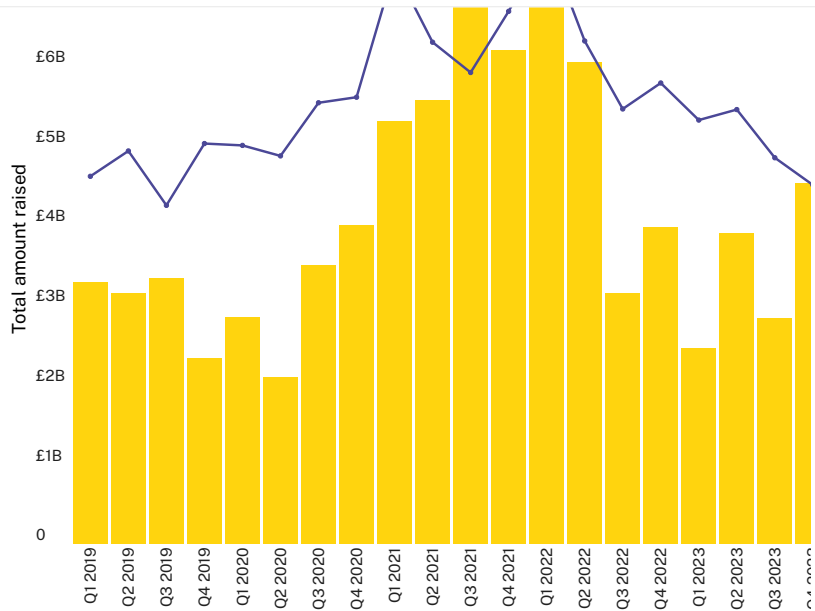

The sections below on regional trends and deal size offer a detailed view of this quarter’s investment landscape. London and the North West experienced the steepest declines in investment, and the average deal size indicates that the drop in deal volume is the primary factor behind the lower total investment value this quarter.

The Q3 2024 data indicates a growing likelihood that total investment and deal counts for 2024 will fall below 2023 levels. However, there is cautious optimism for Q4 2024 — not only because this quarter is typically stronger due to the alternating high low investment pattern but also because low deal numbers

Regional trends

Once again London tops the regional comparison — companies headquartered here secured the highest proportion of deals and total amount raised at 40.8% and 48.3% respectively. These proportions are below the previous quarter’s 50.2% deals and 51.4% value raised, meaning we’re seeing more investment spread across the rest of the UK.

In fact, not all regions saw declines in investment this quarter. Companies headquartered in Scotland, Northern Ireland and the East Midlands raised more in Q3 than in Q2 2024. Scotland-based companies made up 12.3% of all deals this quarter, raising a total of 167m. This proportion of deals ranked Scotland in second place, with a £23.1m increase in amount raised from Q2 2024. East Midlands-based companies attracted 4.6% of all deals this quarter and secured £13.3m more than the previous quarter. Northern Ireland saw a modest increase in investment, up £855k compared to Q2 2024.

Industries

The **software** industry dominated the investment market this quarter, with 42.6% of deals involving software companies. Companies in the **supply chain, manufacturing, and commerce models** industry received the second highest proportion of deals in Q3 2024 with 36.8%, up from 29.1% in Q2 2024. The **information technology, telecommunications, and data** industry ranks third for the proportion of deals completed with 32.6%.

In terms of the value secured, the **software** industry came out on top again, securing 57.5% of all Q3 investment. Whilst securing third spot in the proportion of deals, the **information technology, telecommunications and data** industry ranks second in terms of investment value secured at 33.6% this quarter. Companies in the **life sciences and medical technology** industry secured the third highest proportion of investment value this quarter with 30.1%.

Deal sizes

The £5.08m average deal size this quarter is expectedly lower than the previous average in Q2 2024 at £6.64m, due to the alternating high and low investment quarters. Comparing this quarter’s average deal size to Q3 2023’s average of £4.87m shows that deal sizes in Q3 2024 remain consistent. This implies the reduced number of deals this quarter, down by almost 50% compared to the Q3 2023 deals, is driving the lower total investment value.
