

SaaS News

“Software will eat the world,” the venture capitalist [Marc Andreessen](#) famously predicted in 2011.

Twelve years later, and that prediction has borne out: Many of the most highly valued companies and startups in the world are software startups, and SaaS (software as a service) has become a ubiquitous business model in the tech industry.

Frequently Asked Questions

— What is SaaS?

In simple terms, software as a service [SaaS] refers to software provided over the internet as a service.

Before the rise of SaaS, people generally accessed software by installing it on their computers or servers — think back to buying the latest version of [Microsoft](#) Windows on a CD, for example.

These days, most widely used consumer and business software tools — from productivity tools like [Google](#) Workspace to streaming entertainment platforms like [Netflix](#) — are web-based applications that are delivered as services for which customers pay a regular subscription fee.
