WOMEN IN VC

US VC female founders dashboard

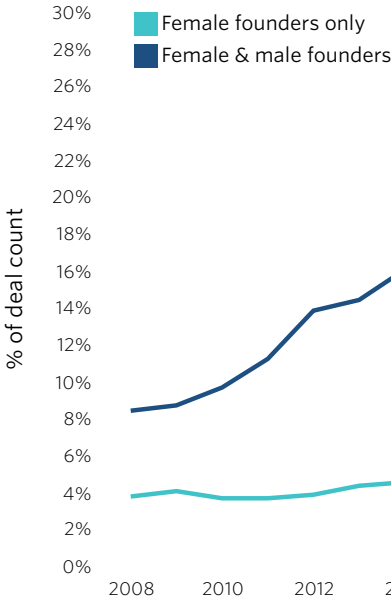

Published August 5, 2025

Venture capital funding for female founders has stabilized after dropping sharply from 2021 highs. In recent years, US companies founded or co-founded by women have received a smaller share of total deals compared to previous years. However, those companies continue to grow their share of capital raised.

The dashboard below dives into US investment trends for women startup founders over the last 16 years with data on deal counts and capital raised by state, industry and stage, and featuring select female-founded startups and firms. The data is sourced from the PitchBook Platform and will be updated monthly.

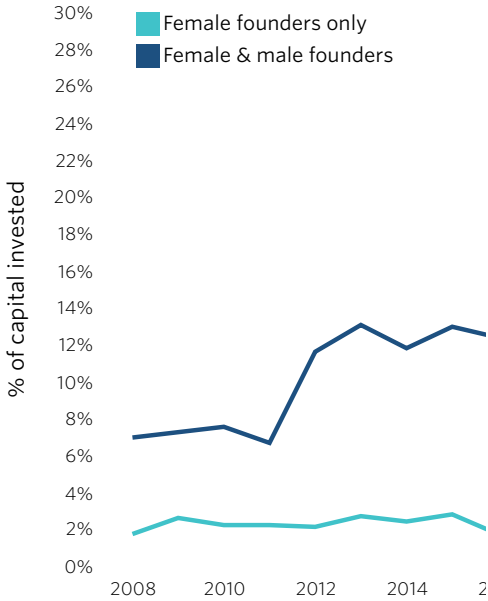

[Check out our European VC Female Founders Dashboard to compare trends between the US and Europe.](#)
