GMC Hummer EV outsold the Tesla Cybertruck last quarter

Sales of Tesla's Cybertruck have plummeted from their peak last year, to the point that the hulking (and expensive) GMC Hummer EV outsold the polarizing pickup-clad curiosity in the second quarter.

Tesla's second-quarter revenue moved from \$5.84 billion in the first quarter to \$5.84 billion in the second quarter.

Both were once again in the red, with Tesla's Cybertruck losing the 5.84 billion dollar market share in the second quarter.

To be fair, both the pickup truck and its SUV variant, although there is very little that differentiates the two. Put another way, the SUV version of the Hummer EV still more closely resembles a truck than it does a typical sport utility vehicle.

Electric truck sales in the U.S. by quarter

Source: Cox Automotive

Rivian has reported that its electric truck, the R1T, sold 1,000 units in the last quarter of 2024, up from 500 in the last year.

But the company's sales have not yet reached the grace period of 100 units per quarter in December. Tesla's sales in the last quarter of 2024 were nearly 10,000 units, as quickly as quickly.

Whether that fall was due to the brand damage wrought by Elon Musk and his involvement with the Trump administration, or the fact that the Cybertruck is still far more expensive than the \$40,000 price tag Tesla promised when it revealed the EV in 2019, is difficult to say.

Tesla's Cybertruck was the third best-selling electric vehicle in the United States in the third quarter, beating out every other EV not made by Tesla. The only two vehicles that sold better were the Model 3 sedan and Model Y SUV.

The polarizing truck notched this achievement despite selling at its most expensive trim model in the early going. It's also a sign of just how much trouble major automakers like Ford and General Motors have run into in finding customers for their own EVs.

Fiat Chrysler Automobiles CEO Mike Manley confirmed Wednesday the automaker's Ram brand will bring an electric pickup truck to market.

The remarks, made in response to an analyst question during the company's third-quarter earnings call, puts to rest rampant speculation, which was fueled by previous comments from Manley, that the automaker was planning to join what promises to become a crowded new category. The Detroit Free-Press was the [first to report the comments](#).

"I do see that there will be an electrified Ram pickup in the marketplace, and I would ask you just to stay tuned for a little while and we'll tell you exactly when that will be," Manley said without providing additional details.

Fiat Chrysler reported Wednesday adjusted earnings of €2.28 billion (\$2.7 billion) on €25.8 billion of revenue in the third quarter, driven by strong sales in North America and putting the company back in the black after struggles earlier this year due to the COVID-19 pandemic.
